# Singup

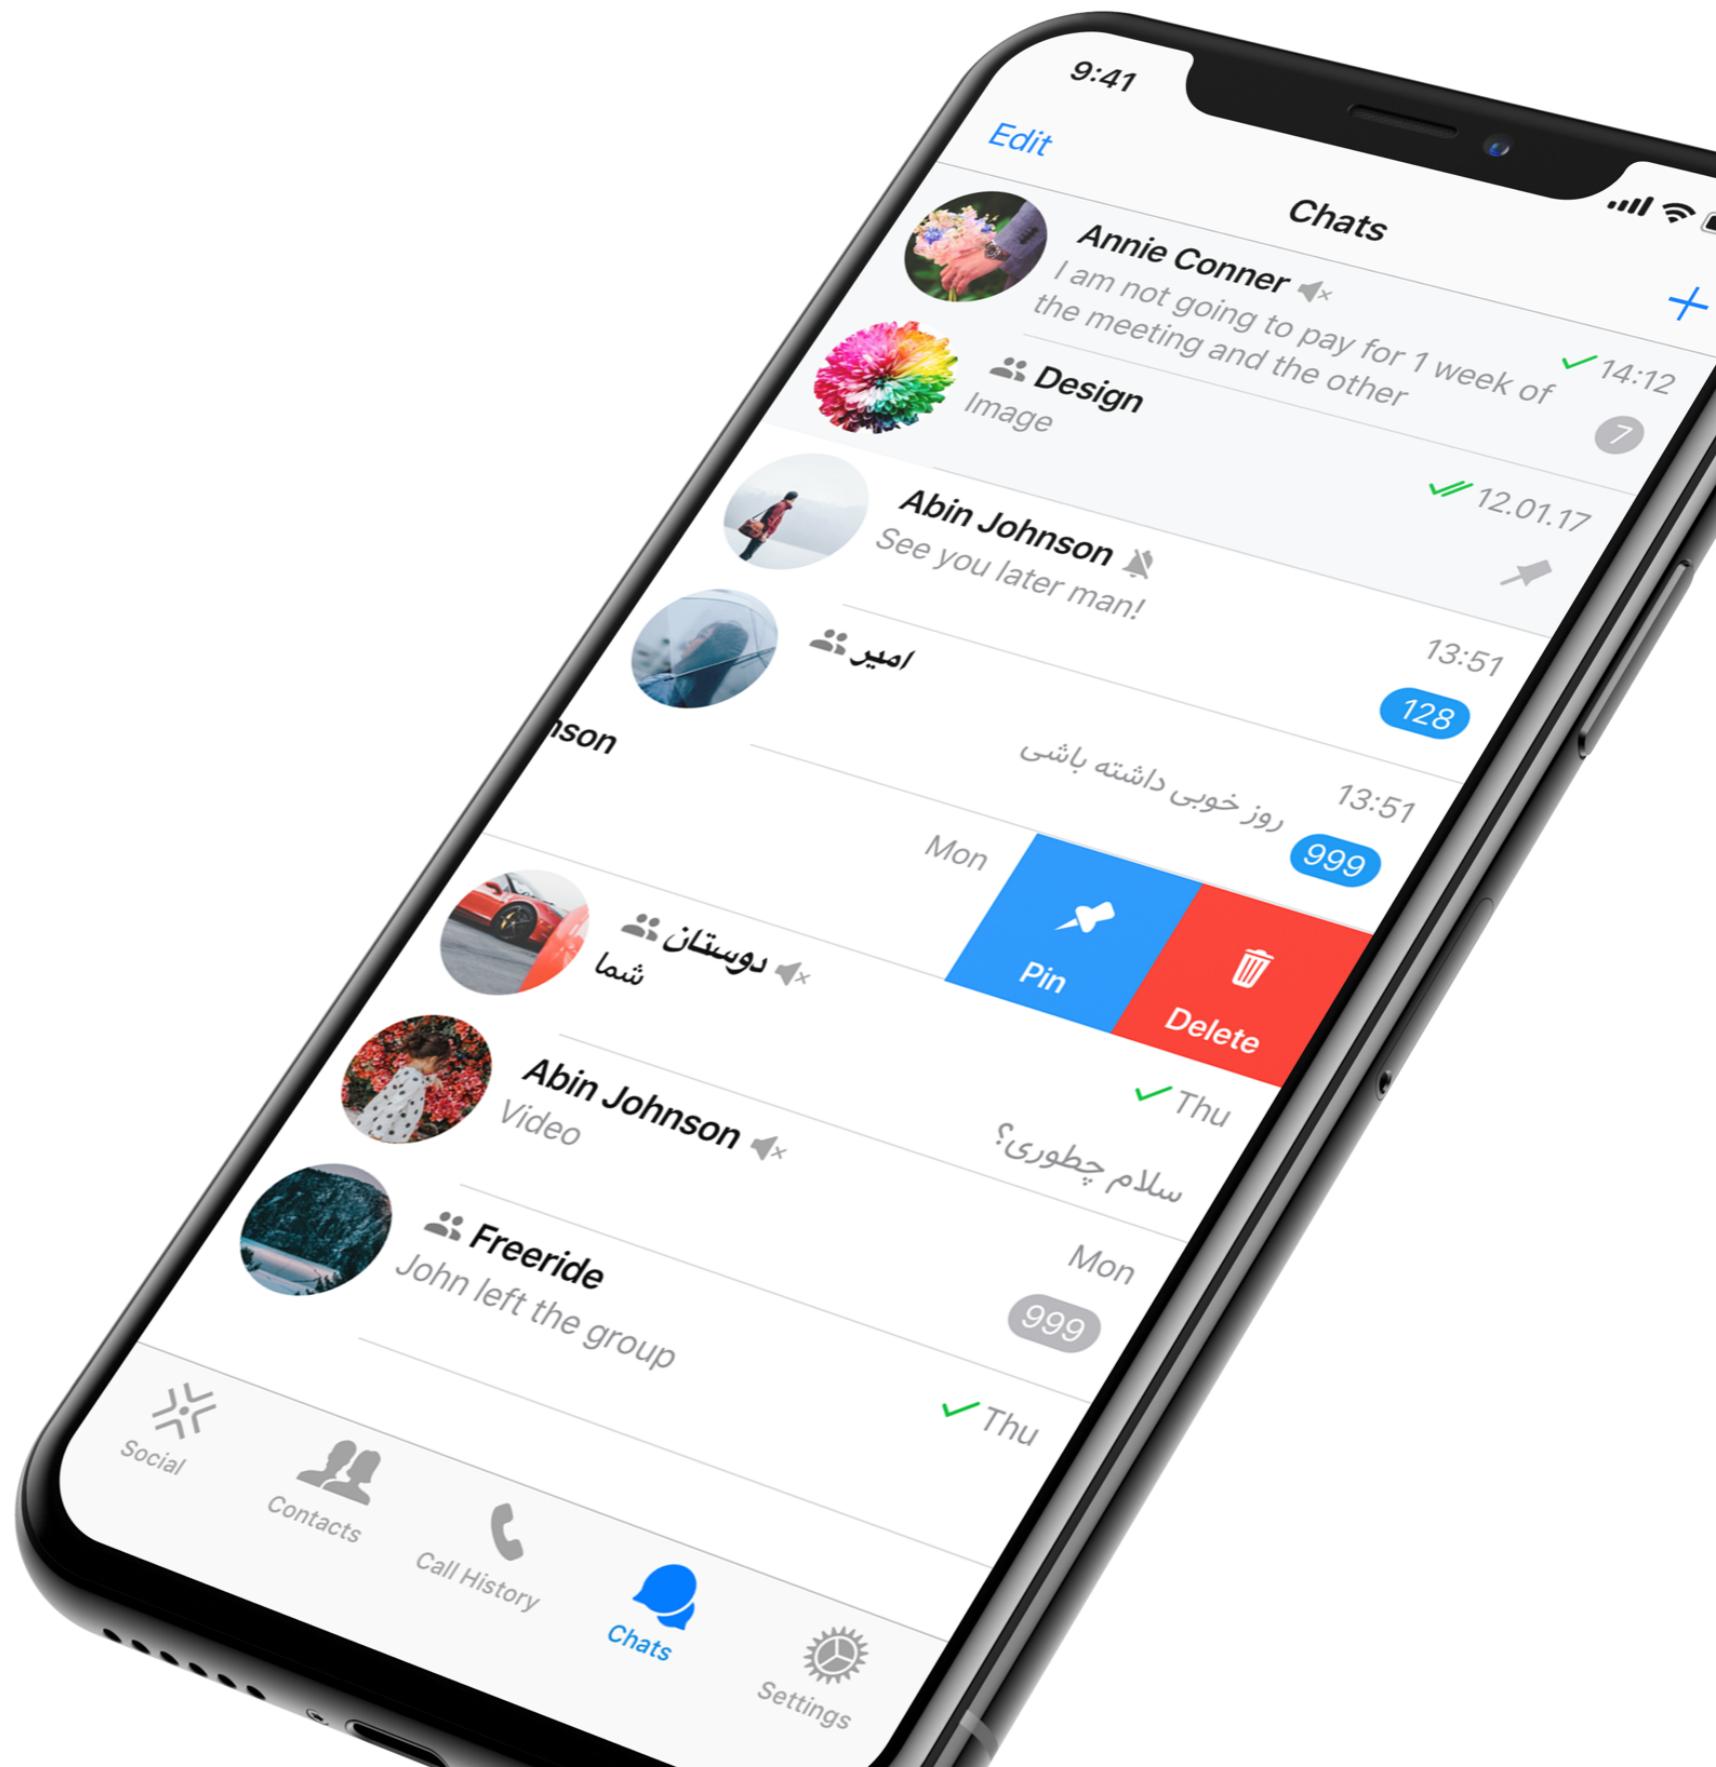

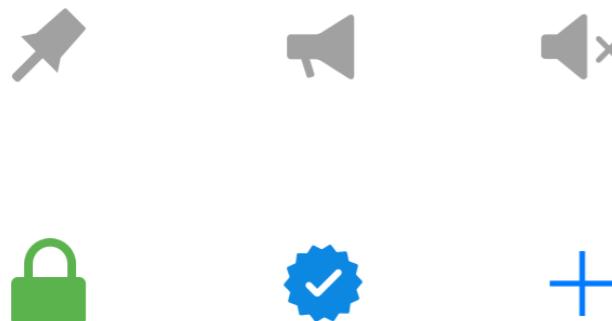

First impression is important - that why we've created clean & clear signup process.

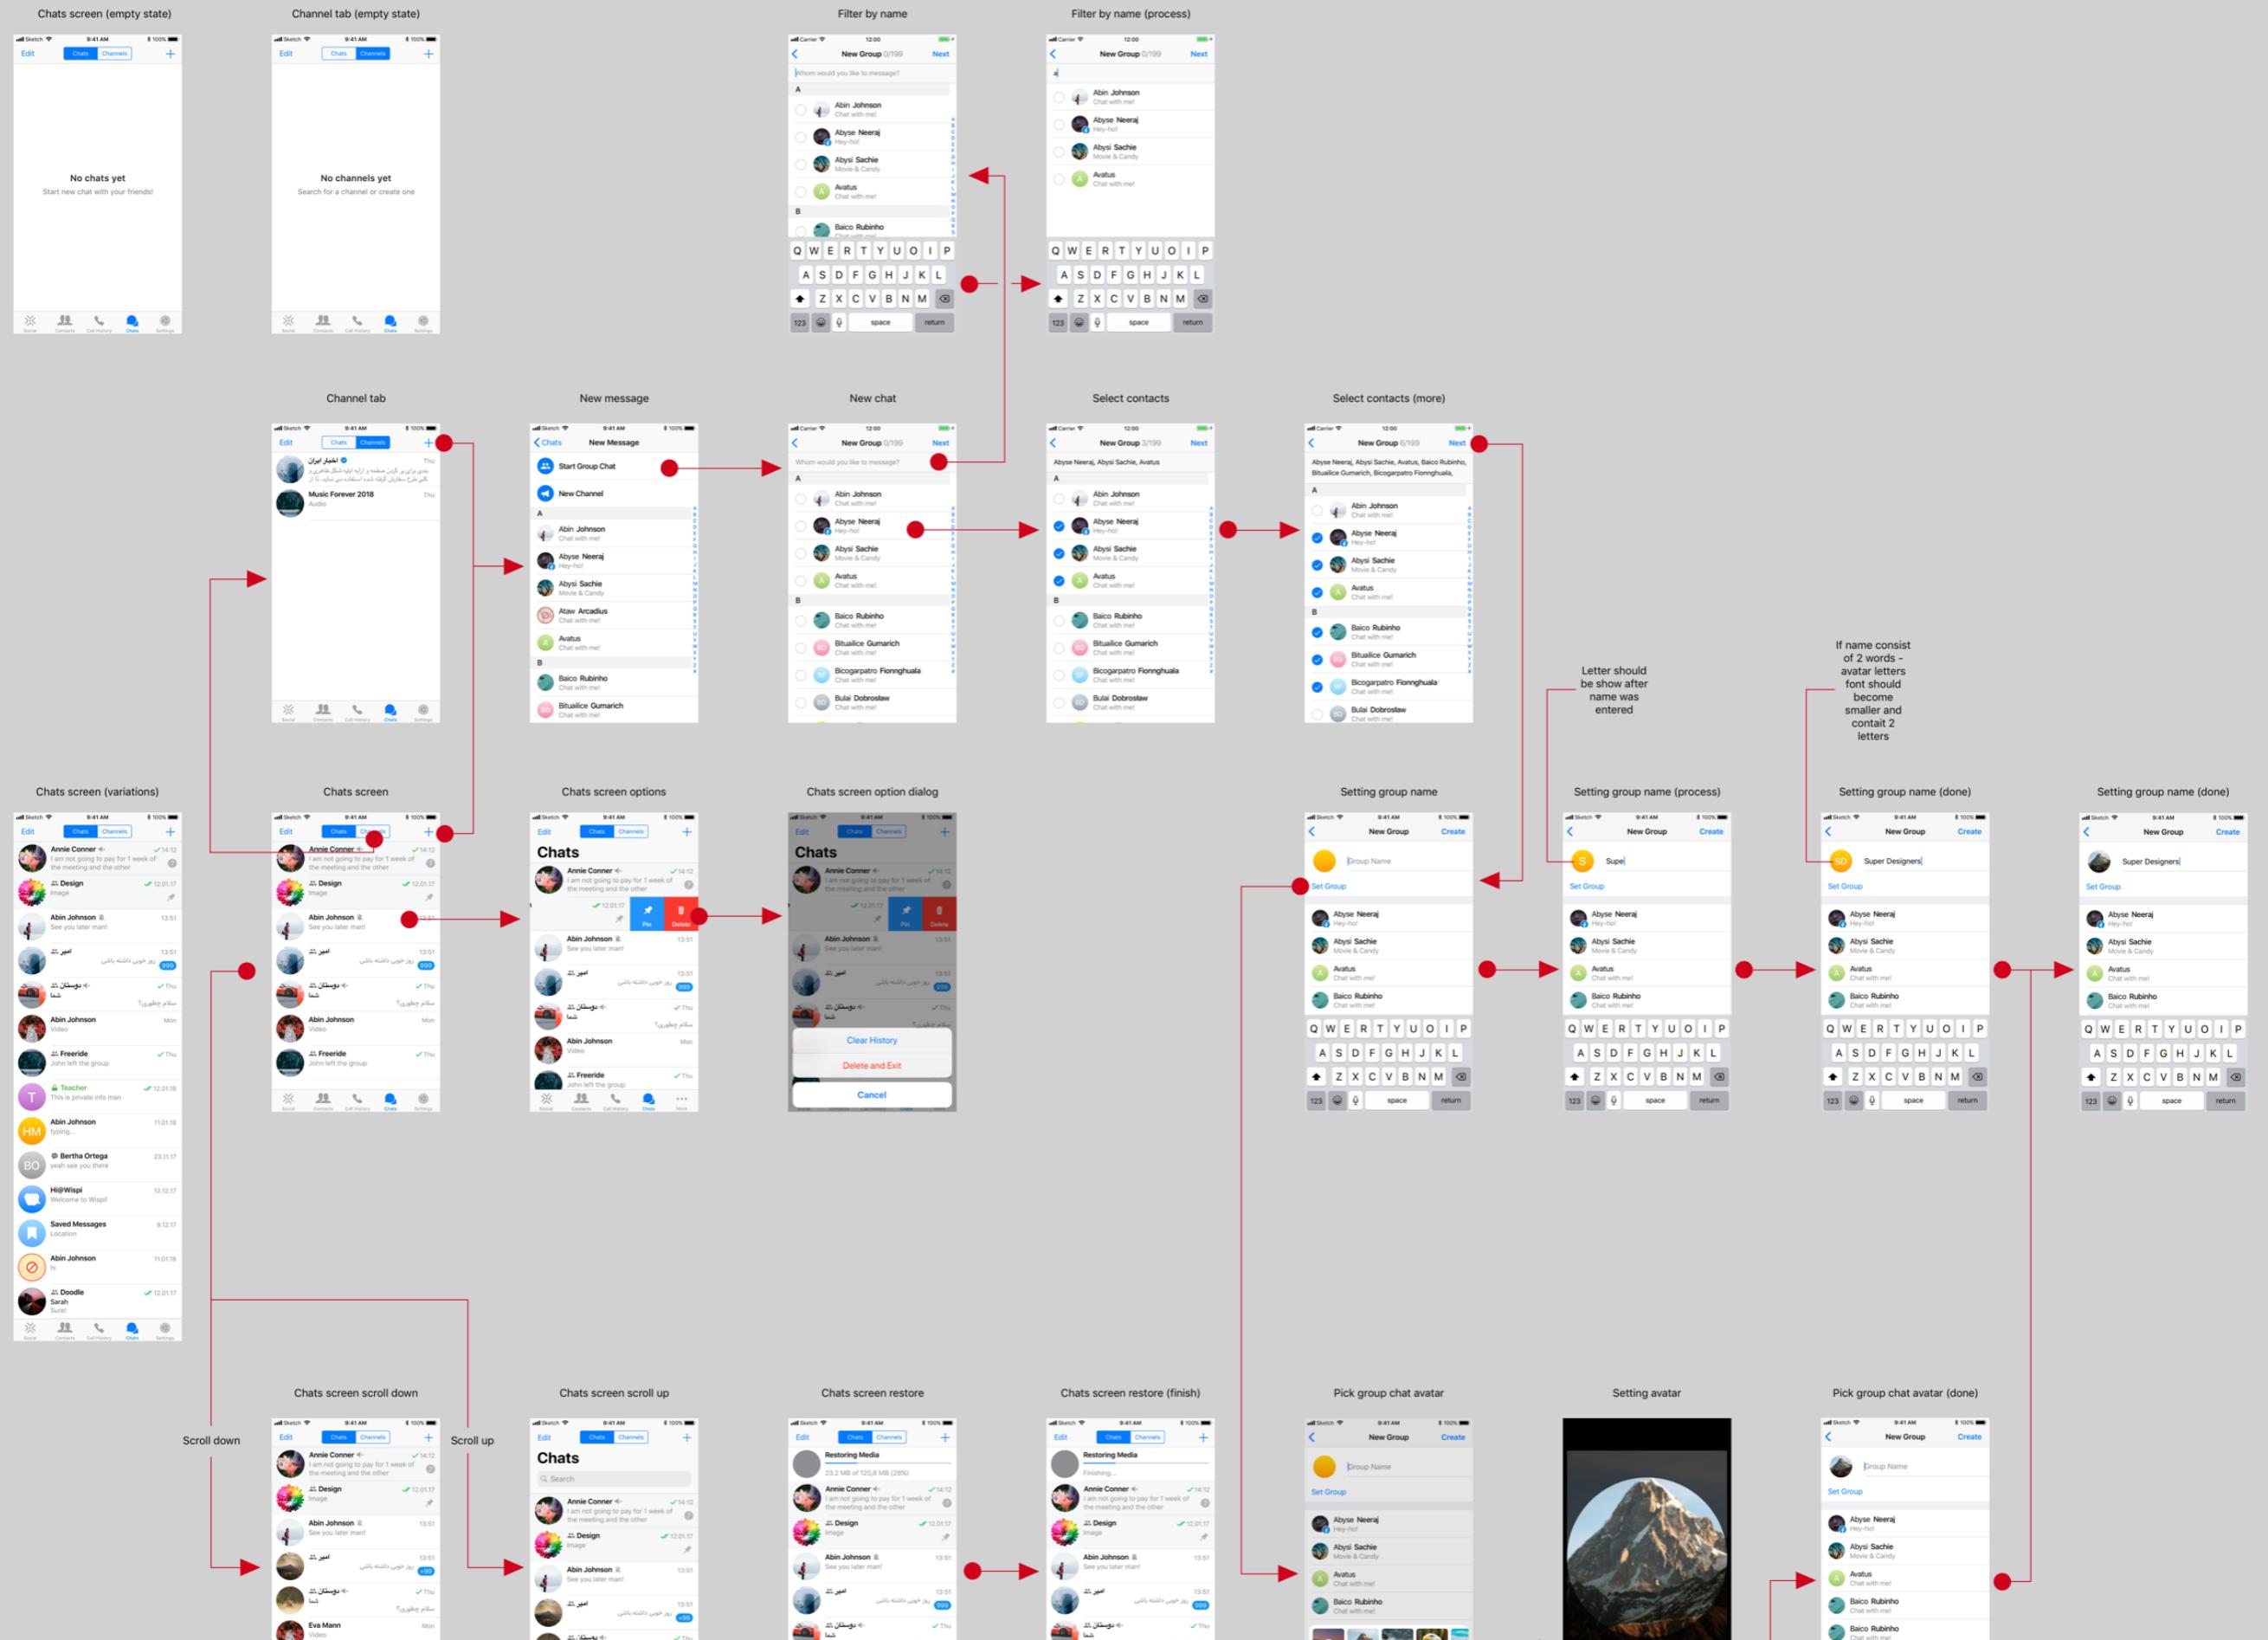

# Main screen

Chats screen lets you see the overall picture of the app.

Clean interface lets you focus on what's really matters to you. Using handy shortcuts you can manage your chats very easy. Meaningful icons give you more information without bothering much.

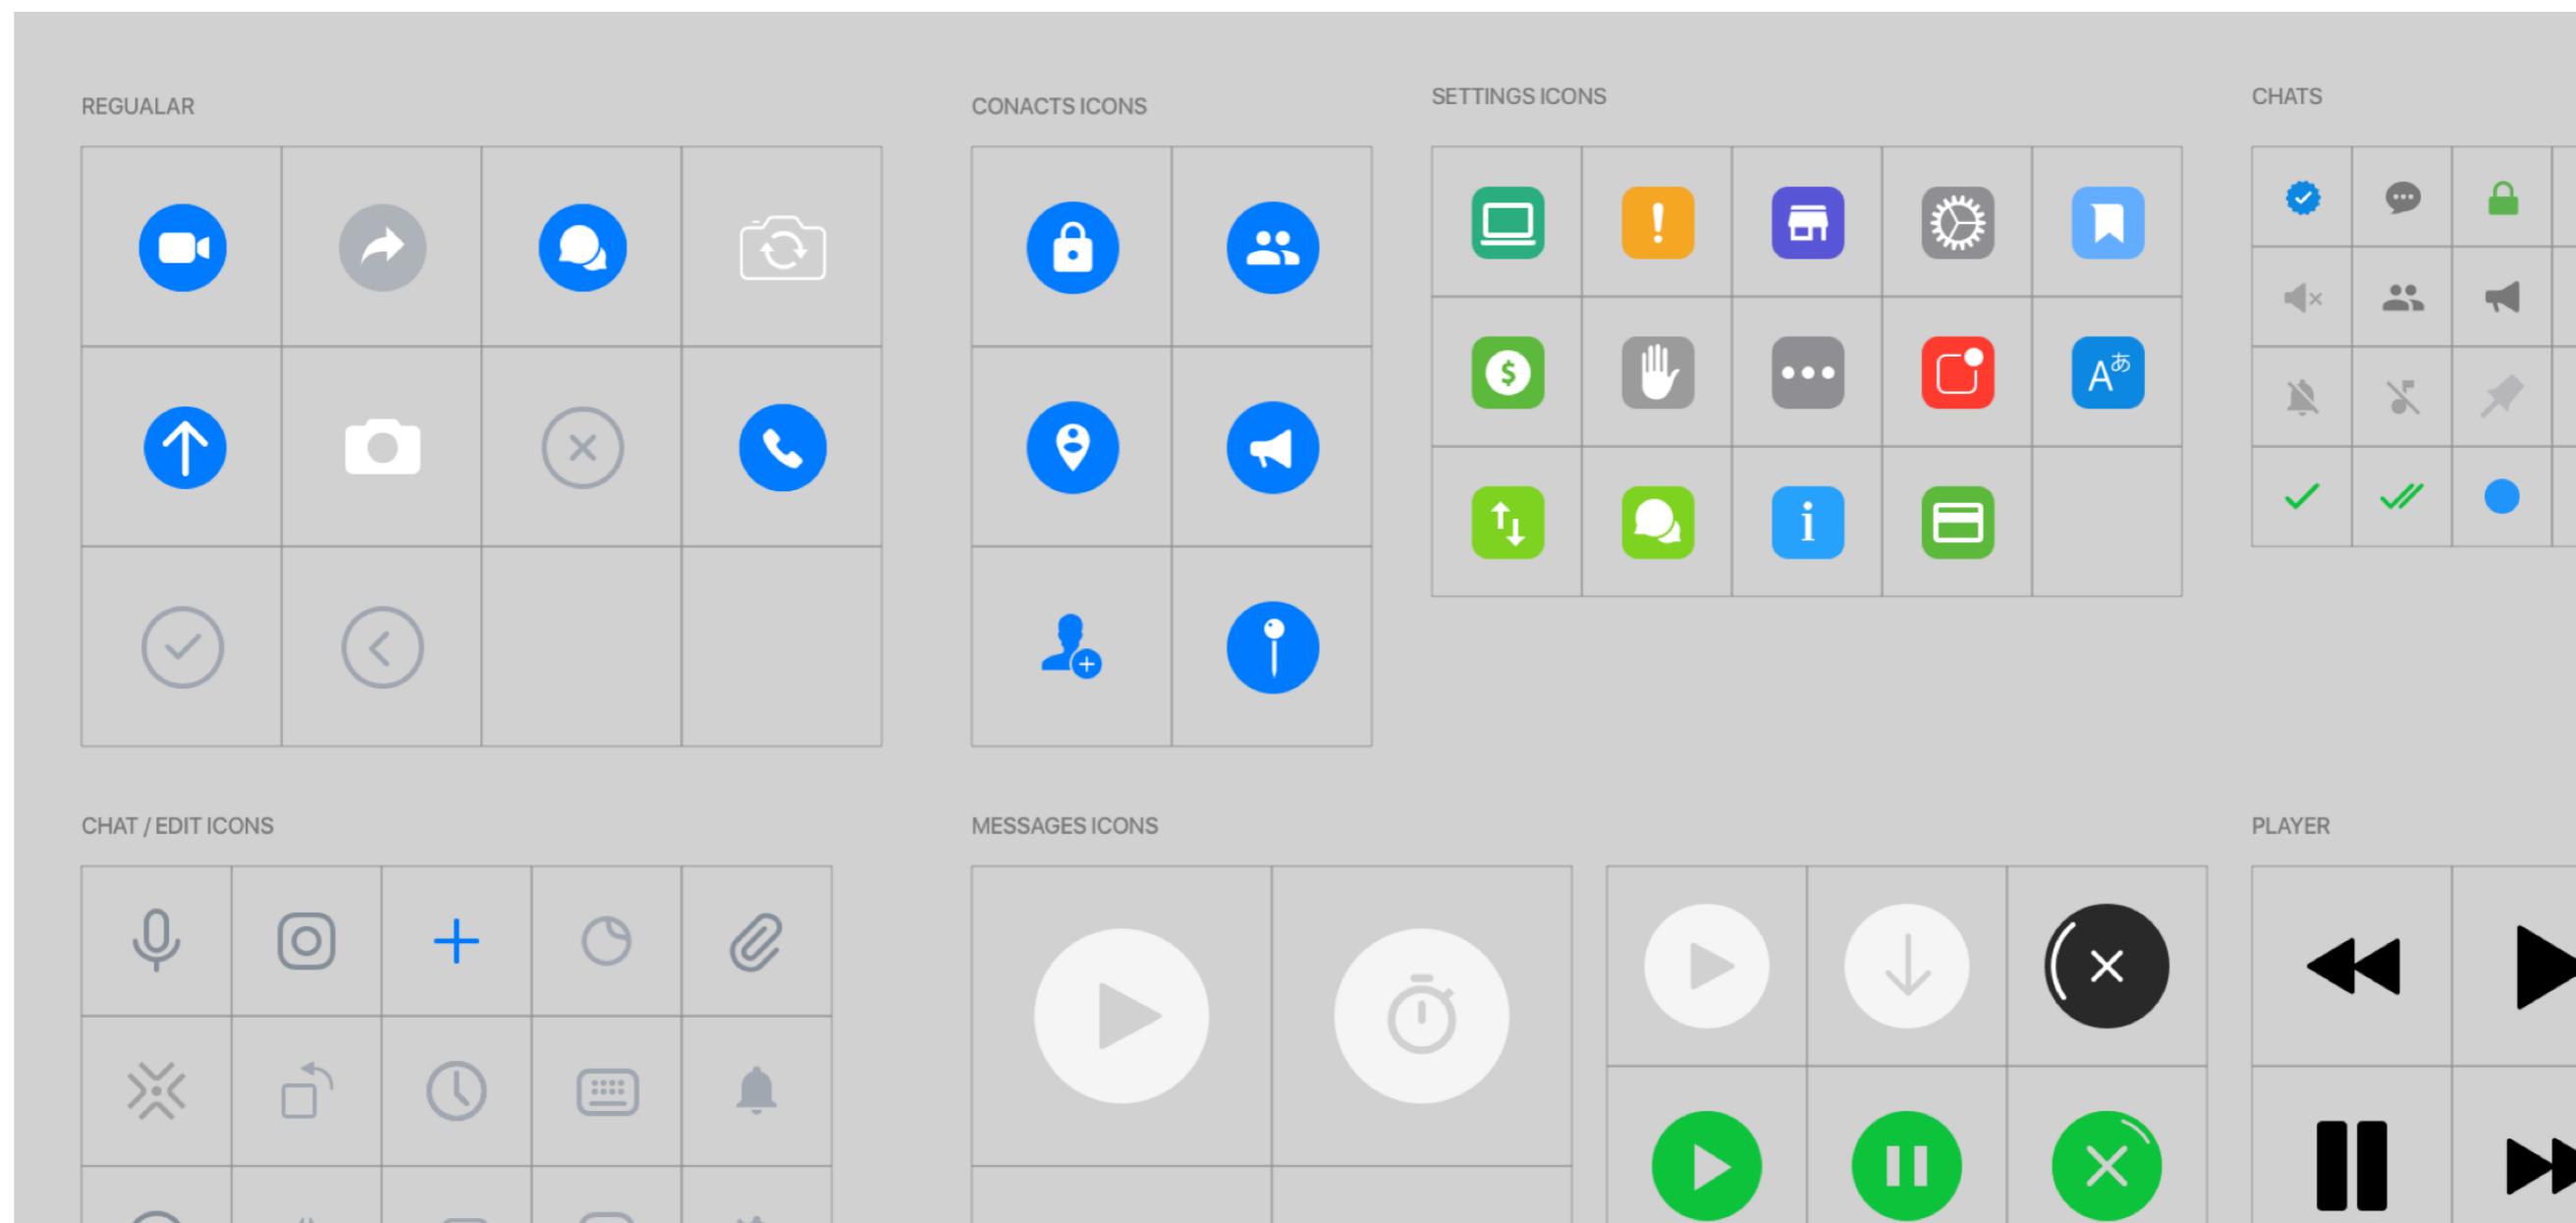

# Icons & Illustrations

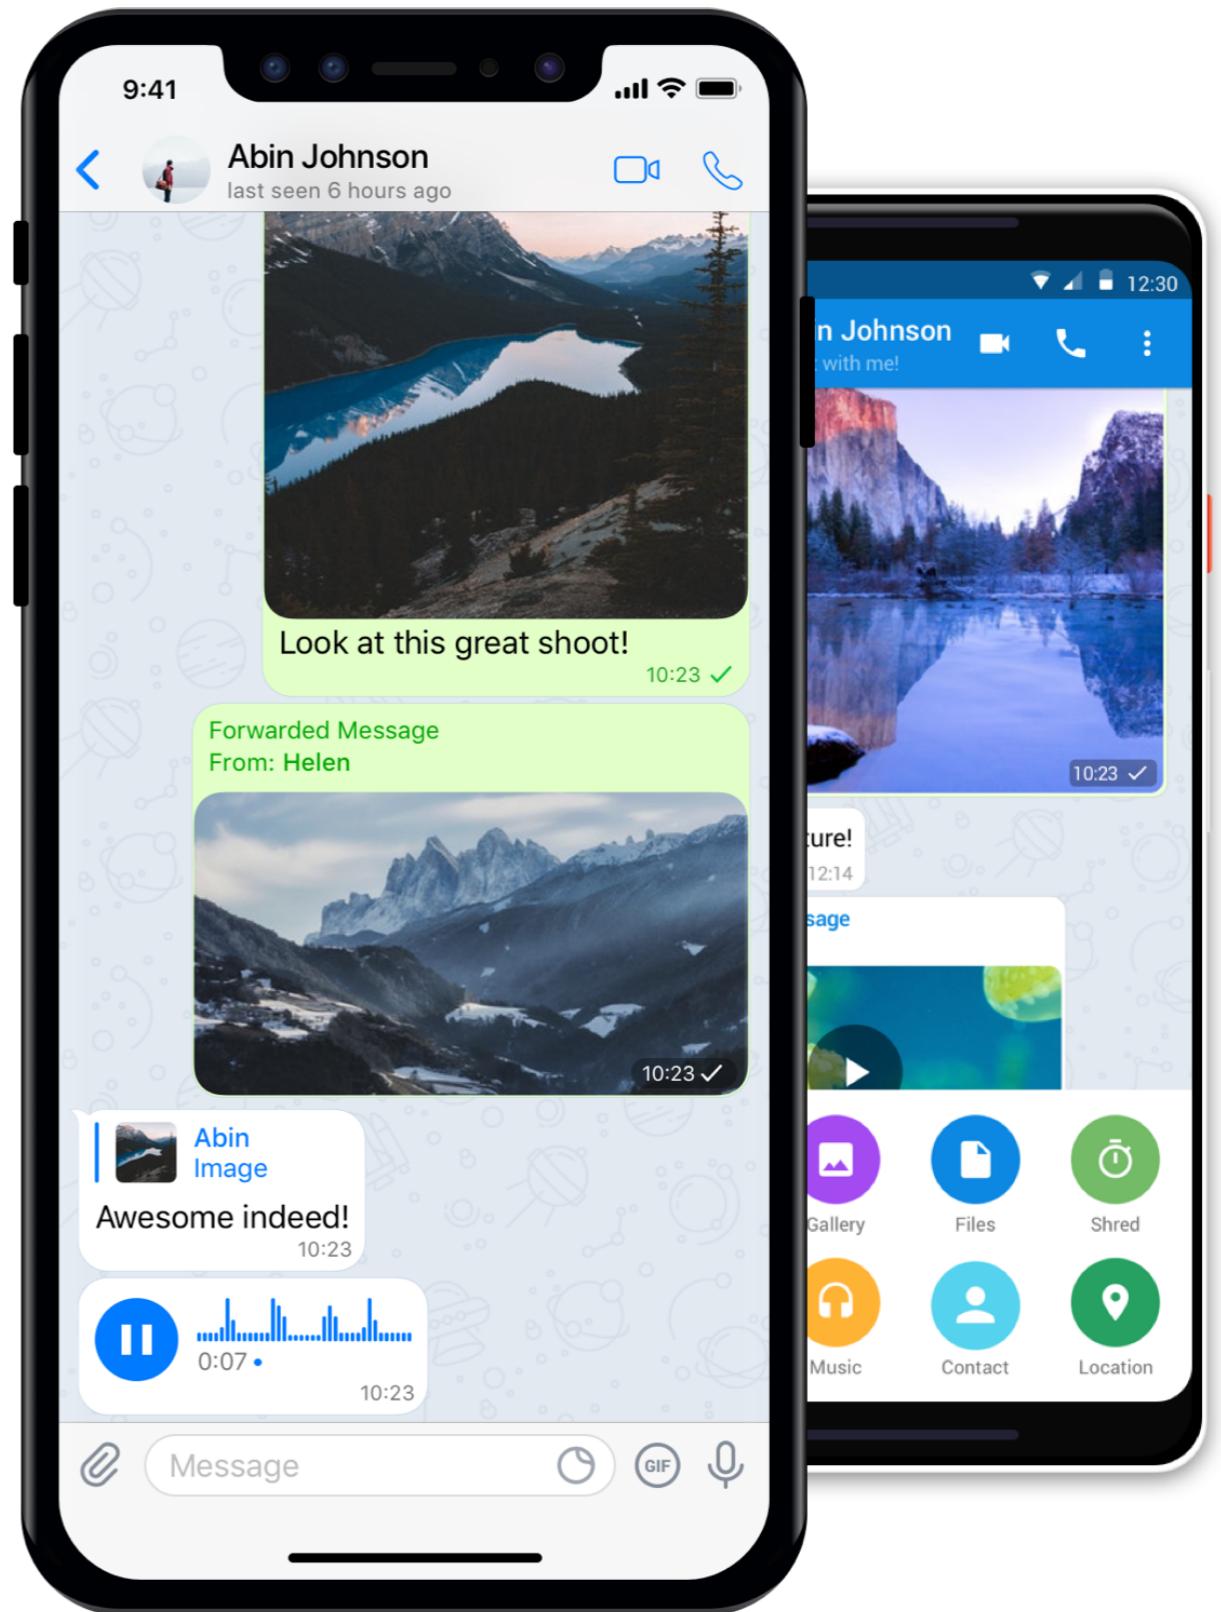

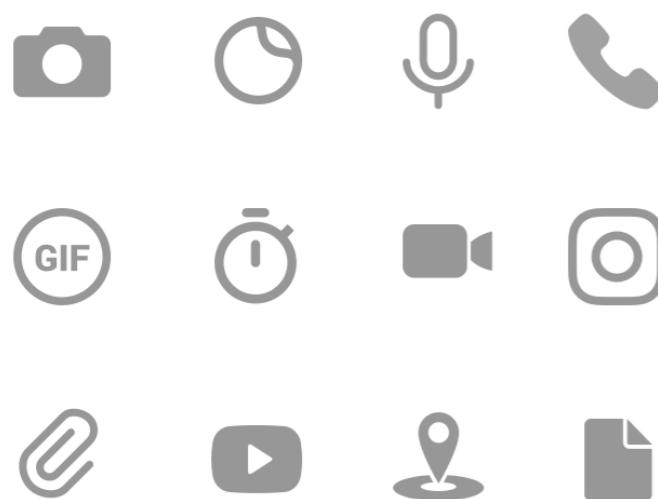

Good icons can make a huge impact on the product.

We want the icons to match the style we chose without losing sight of the platform guidelines.

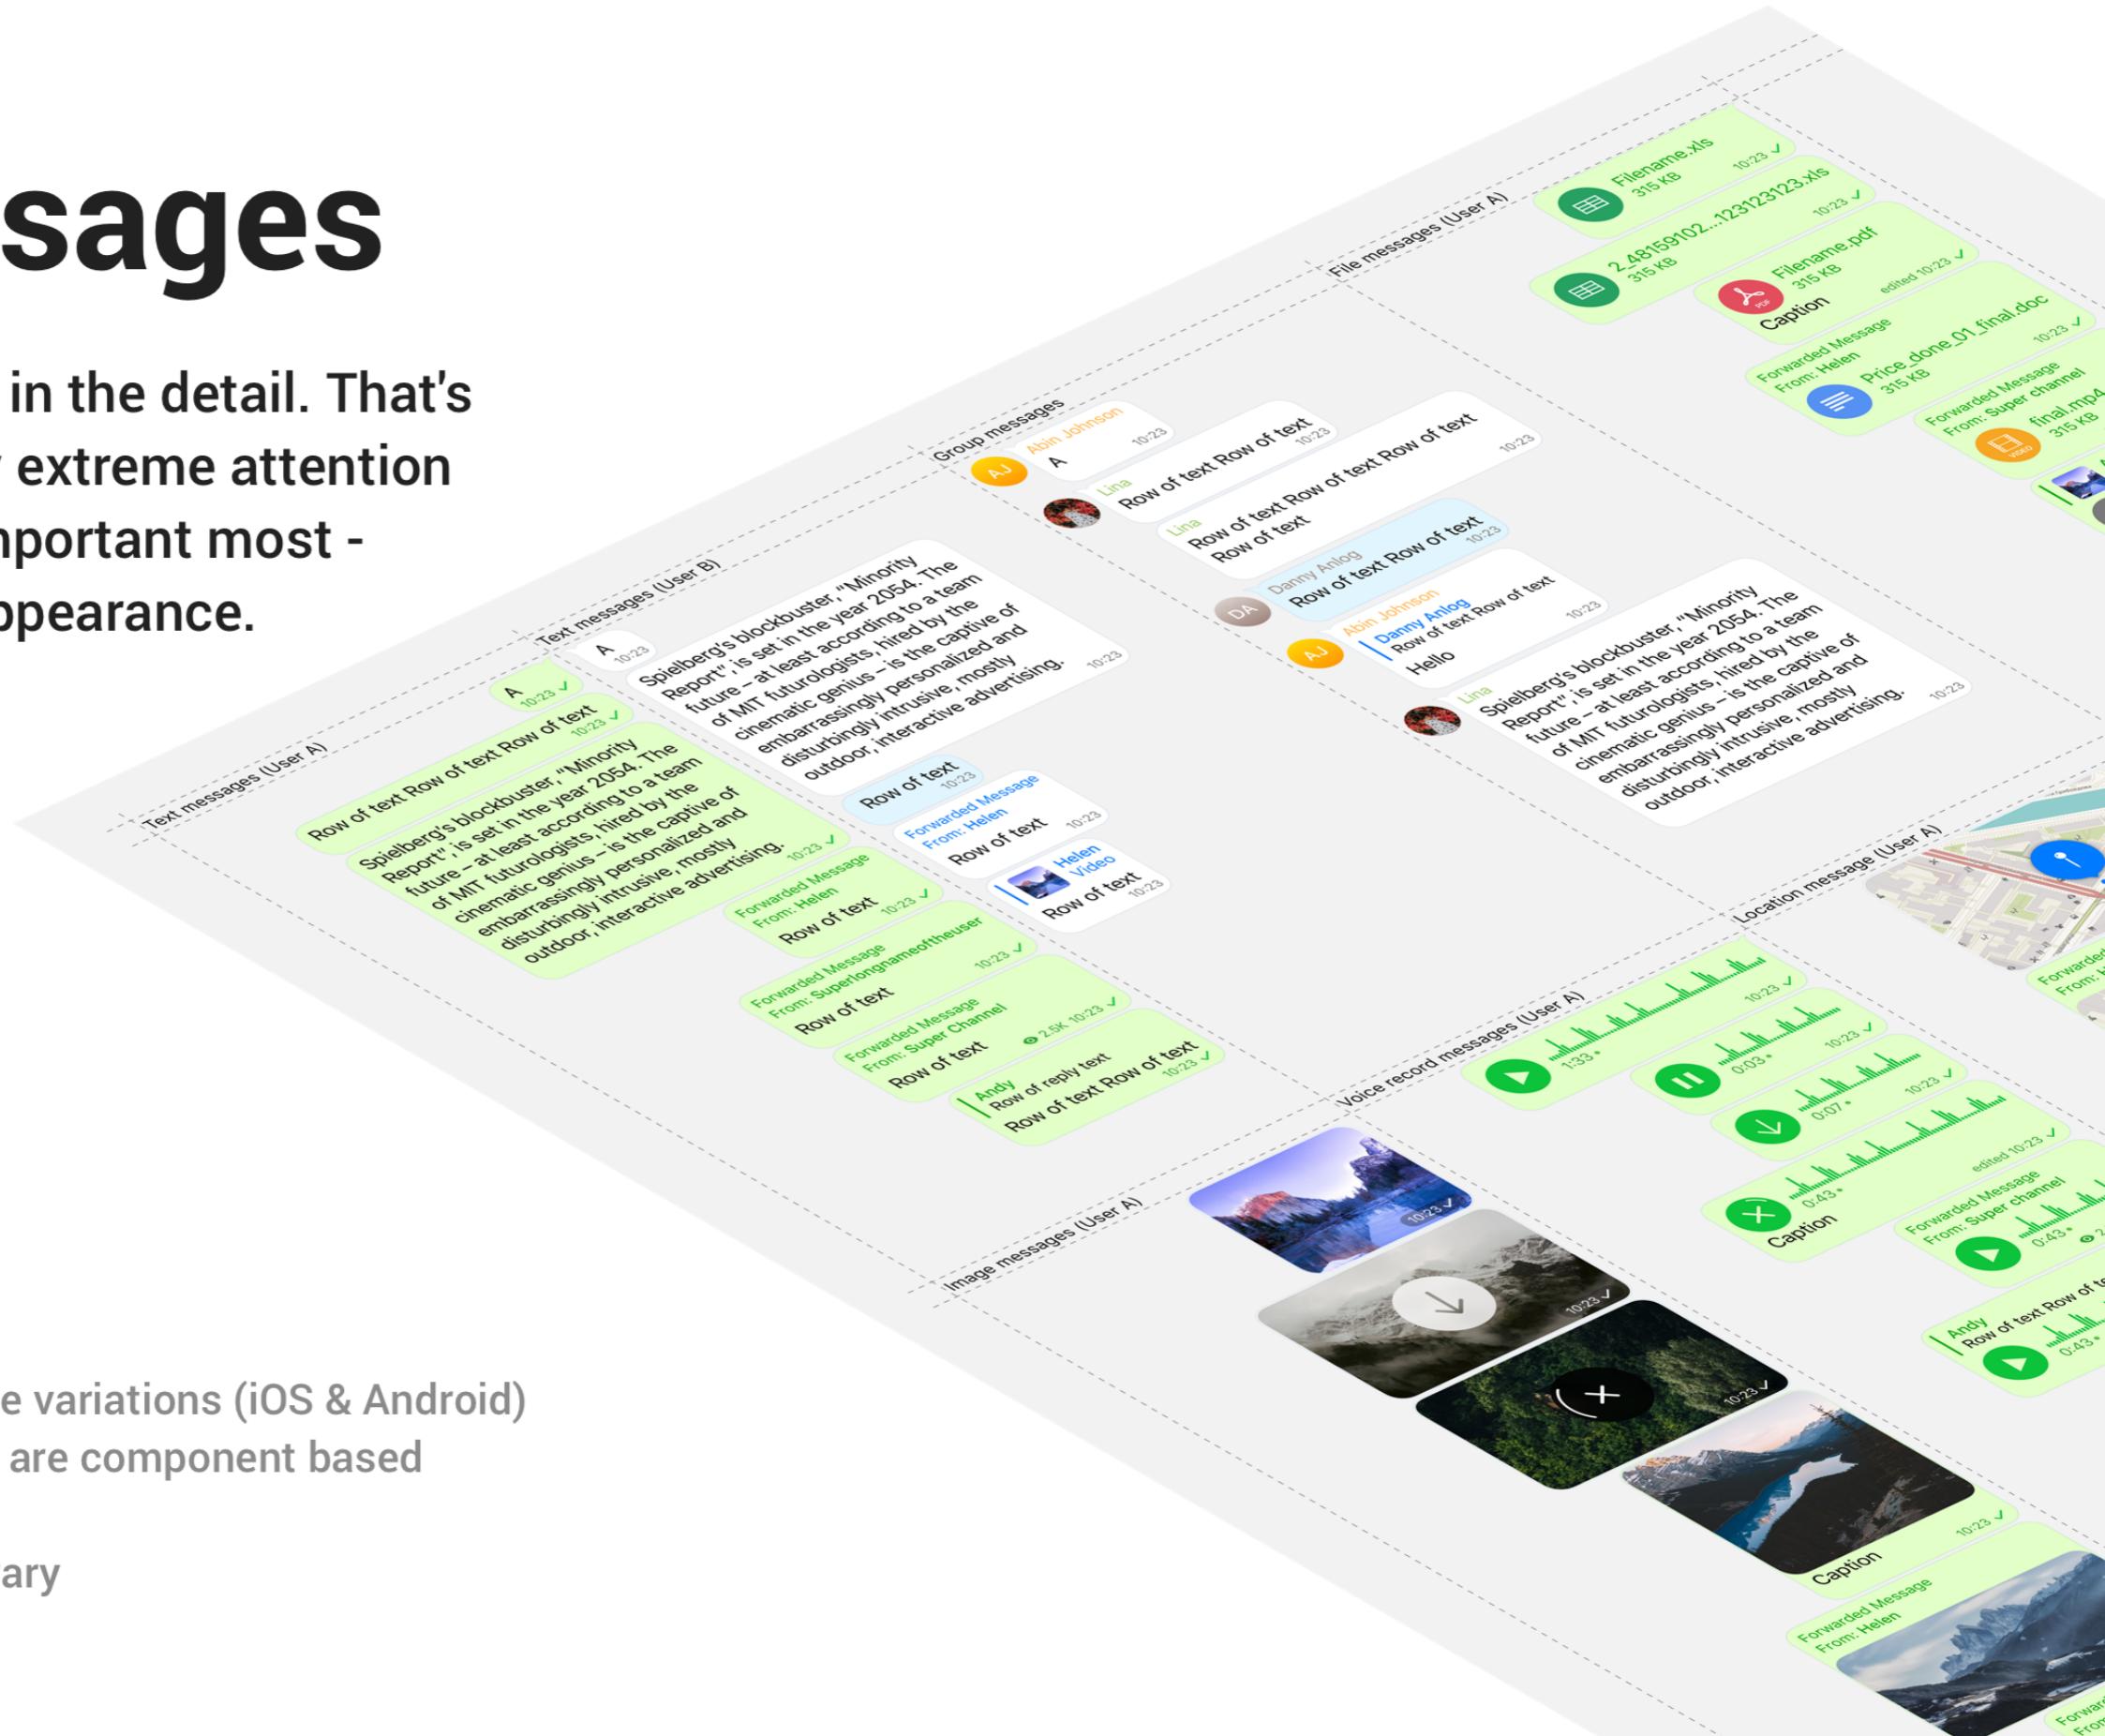

# Chat screen

Chat is the heart of the app.  
You can do everything in it.  
Infinity possibilities to share  
your thoughts and moments

# Messages

The devil is in the detail. That's why we pay extreme attention to what's important most - message appearance.

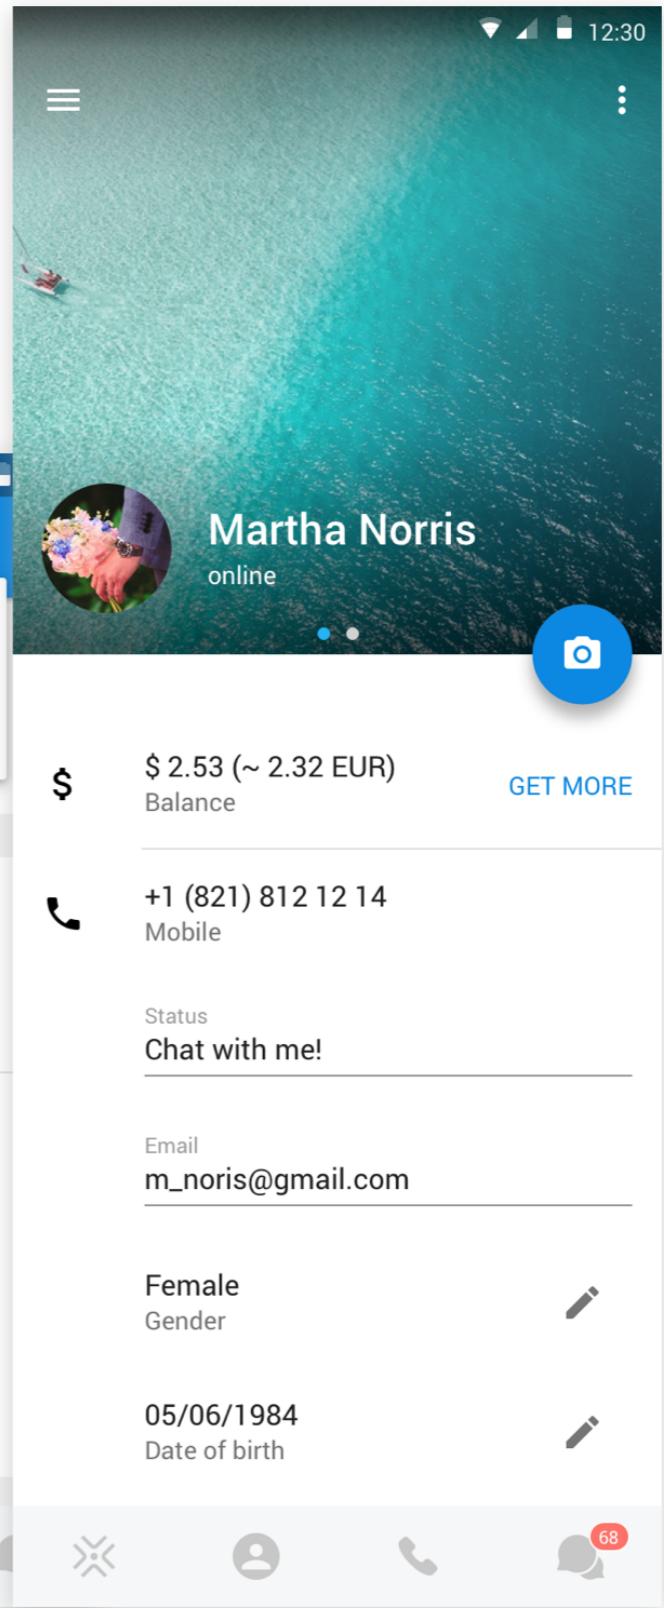

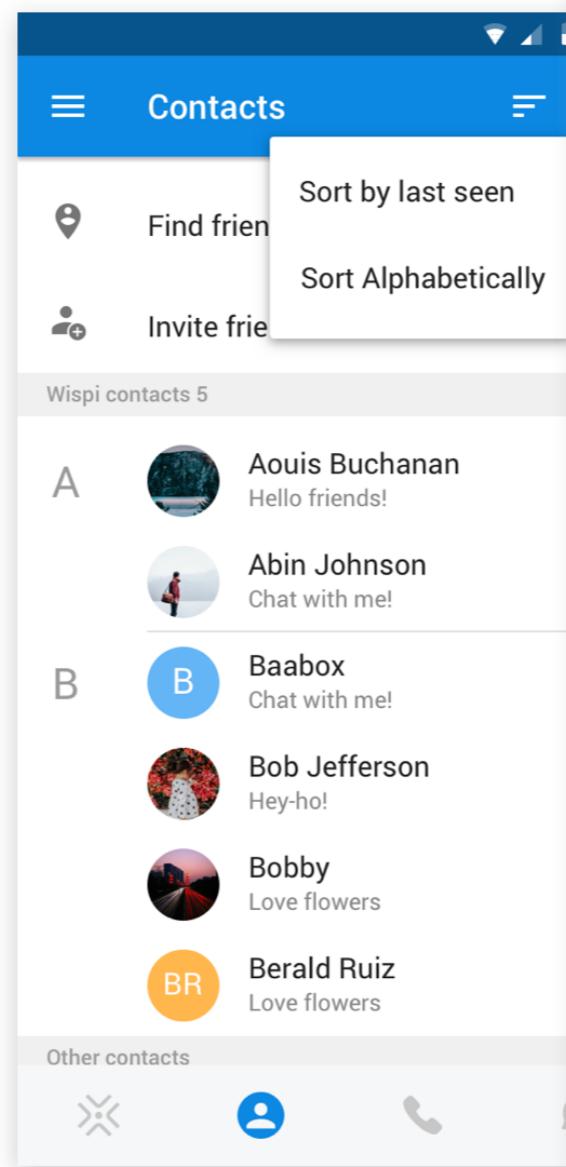

- 800+ message variations (iOS & Android)
- All messages are component based
- Resizable
- Packed in library

# Native UX

Using latest guidelines for smooth user experience both for iOS & Android.

Using Material design guidelines when creating UI guarantees best practices and natural behaviour for users.

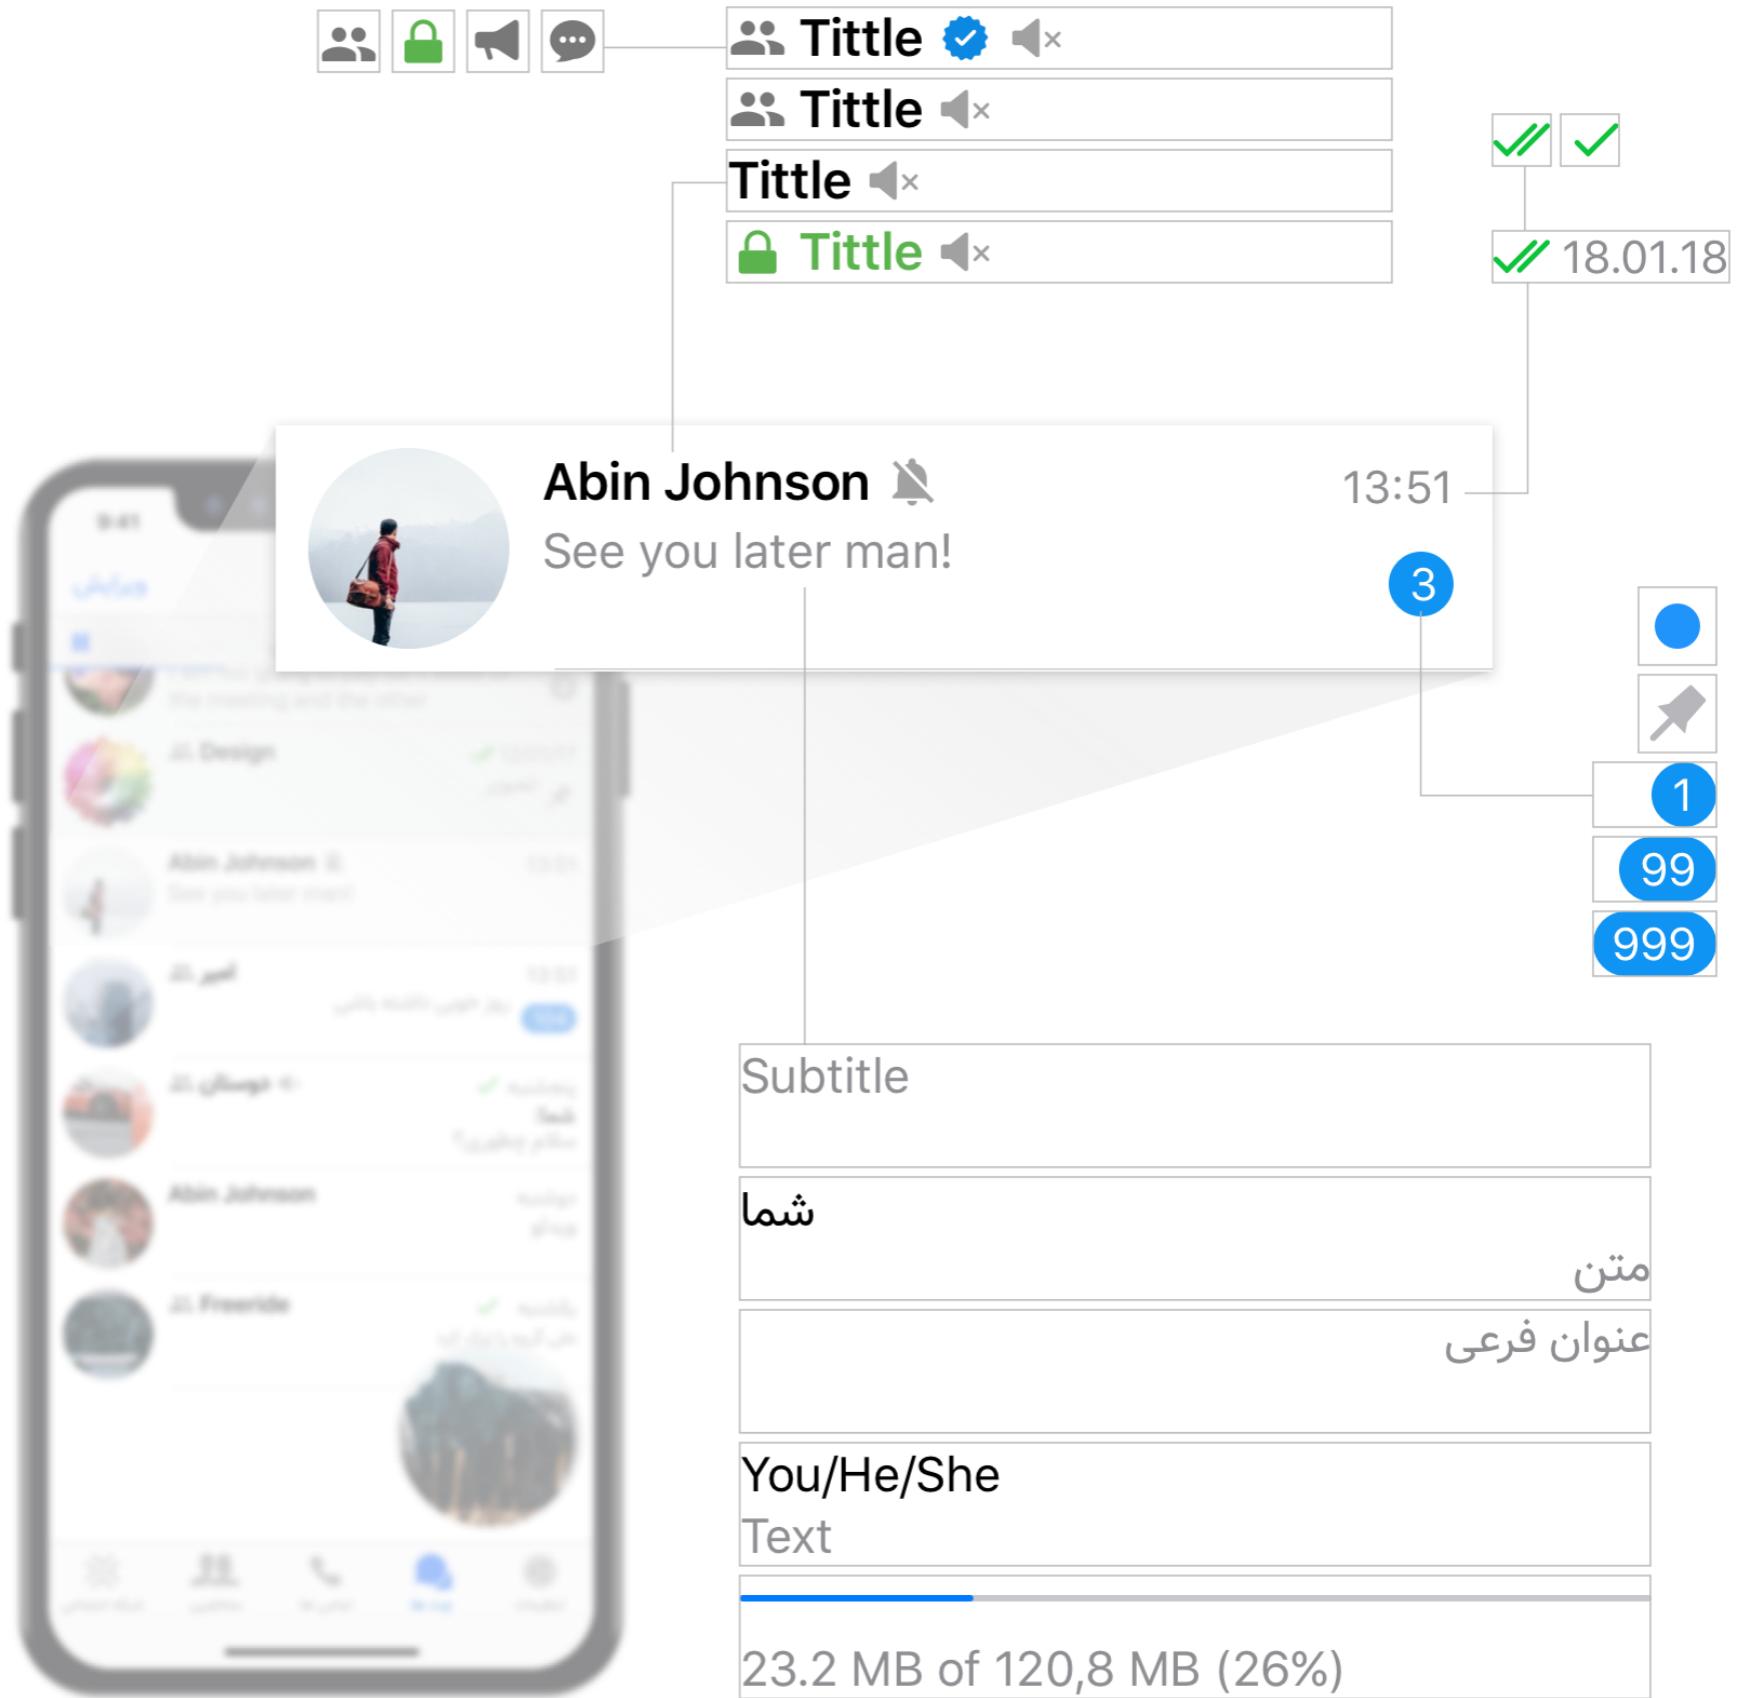

# Scalable

Using component approach  
app can grow faster with  
keeping transparency

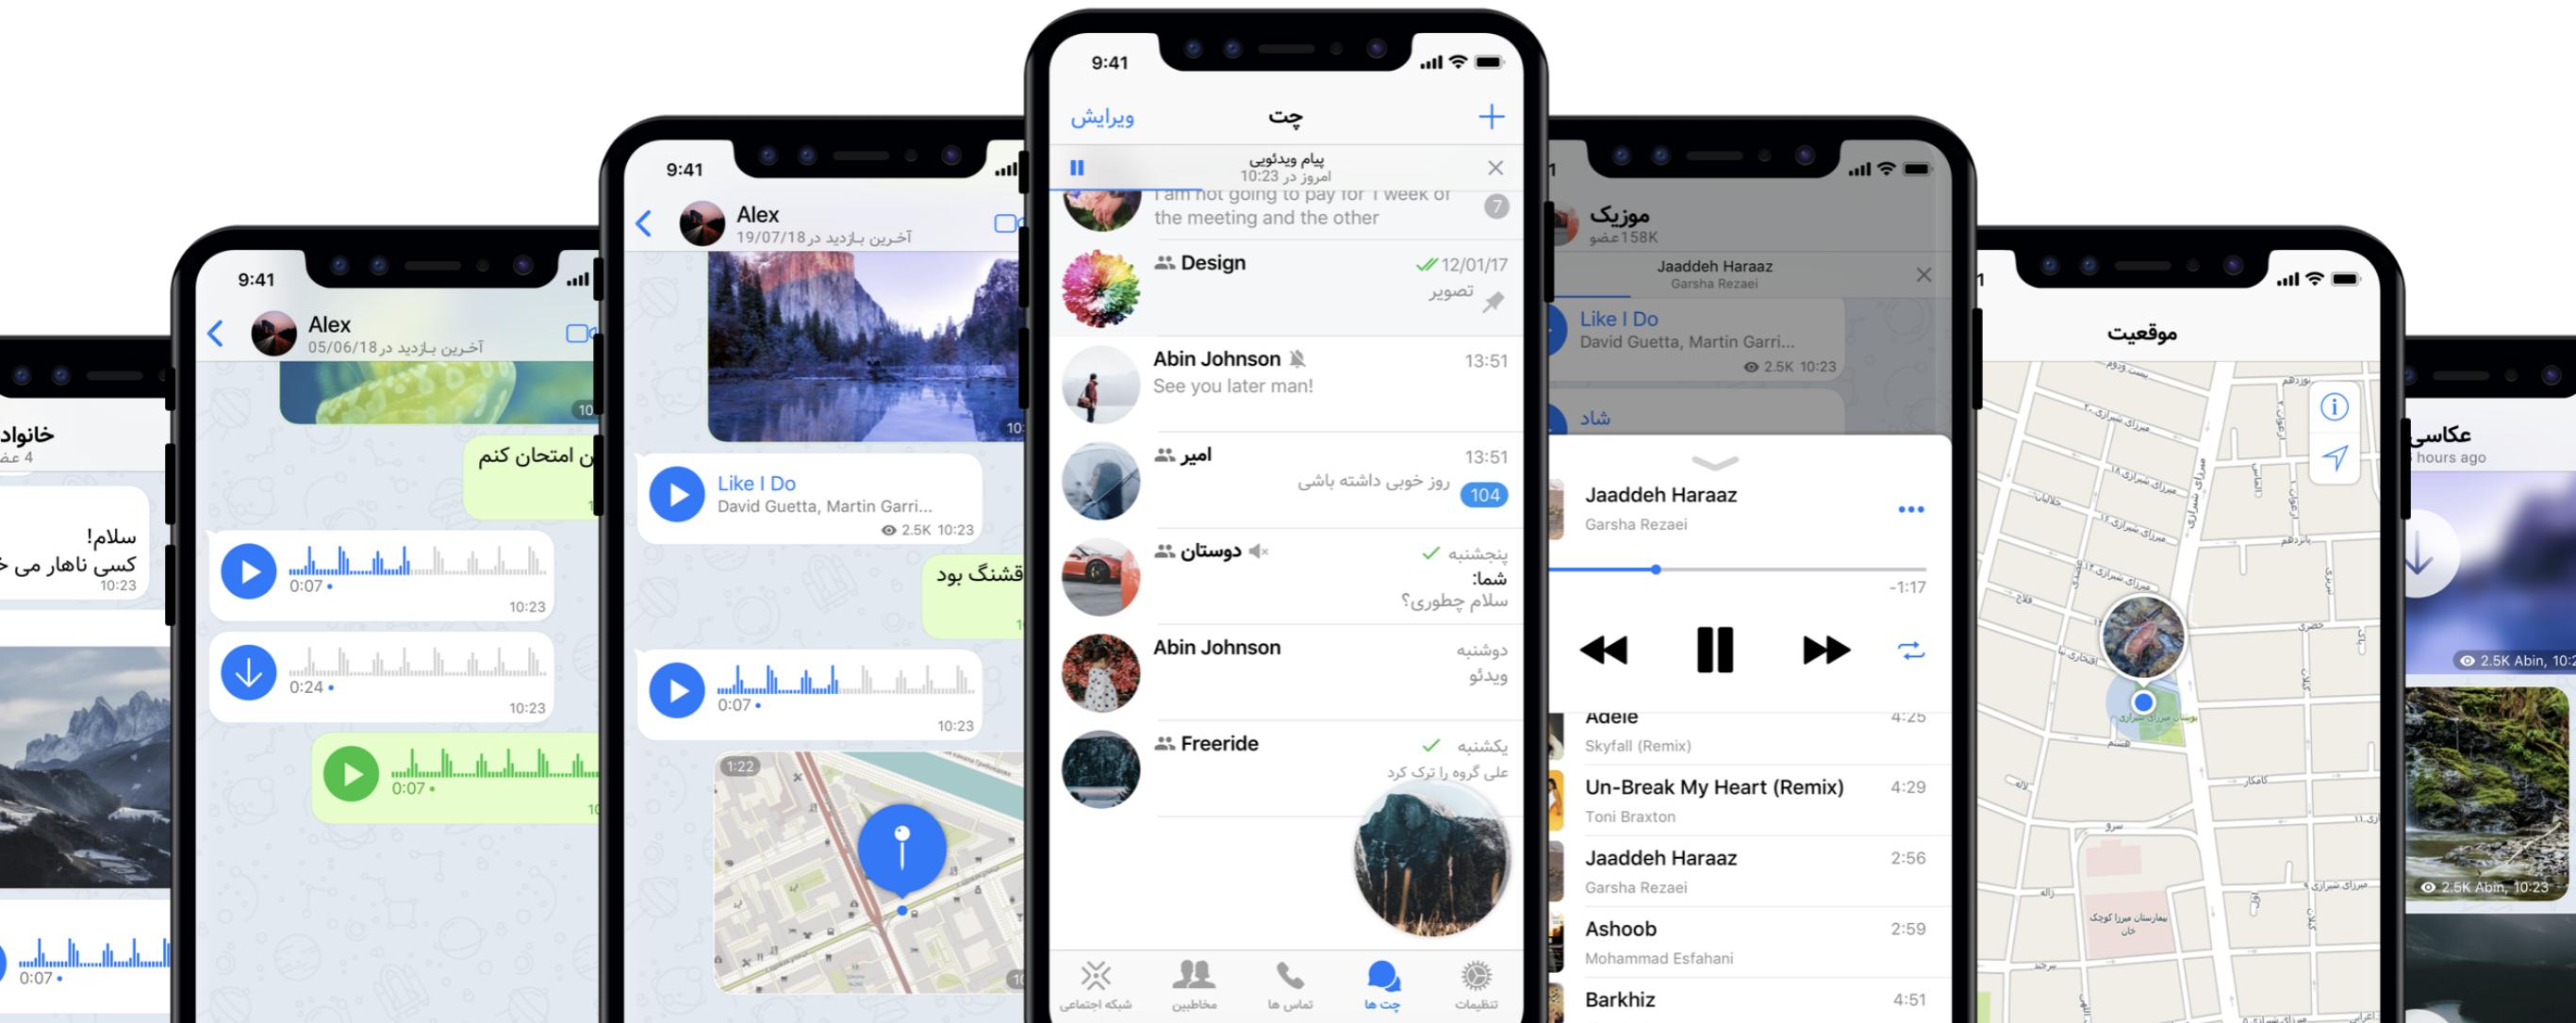

- 40+ complex components
- 2k+ screens
- 250+ schemes

In order to keep things rolling  
creating libraries for each  
platform lets us creating and  
refining design with same  
speed and efficiency.

# So much more!

Video calls, music player, video messages, bots, channels and much more will be shown soon. Stay tuned!

**Thank you**
